

## **DARK SKY FRIENDLY FIXTURES AVAILABLE FROM HOME DEPOT**

Looking for Dark Sky friendly light fixtures or shields? Buyer be ware, many fixtures on the market that are labeled as “Dark Sky” are actually not. For example, the fixture on the right is labeled Dark Sky, but the bulb is clearly visible; it will shine light up into the sky and cause glare for anyone nearby.

The following list of truly Dark Sky friendly fixtures was compiled from reviewing the items that come up on a search for “Dark Sky” on Home Depot’s website and removing those fixtures that do not adequately shield the light source to minimize sky glow and glare. The list includes a few shields and many fixtures. You can feel confident purchasing these shields and fixtures that they will do the trick.

Remember, even the most shielded light fixture can create sky glow, glare, and light trespass, depending on how it is installed. It is important to consider the location and orientation of the light fixture relative to the surrounding area to avoid sky glow, glare, and light trespass.

Finally, no light, no matter how effective its shielding and installation, should be left on when it is not needed.
